

### A Well-known Bellows Factory.

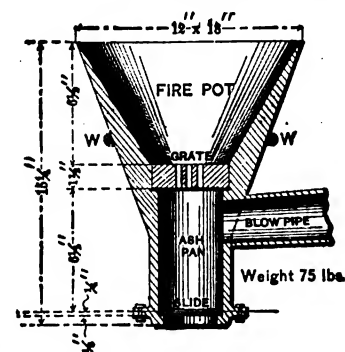

In many a blacksmith shop where this paper is received the proprietor may be thinking of replacing his old, worn-out bellows with a new one; or, per-

Standard Bellows. Manufactured by the Bullock Bellows Co., Cleveland, O.

haps, the increase in his business will justify the addition of another forge, for which a bellows will be necessary.

All such will be specially interested in the advertising notice, found elsewhere in these columns, from the Bullock Bellows Co., of Cleveland, Ohio. This company makes bellows in great variety of style, size and quality. The very best bellows that can be made will be furnished to those desiring a high-priced and extra durable article; or cheaper bellows, though still

Combination Tuyere Iron and Fire Pot. Manufactured by M. J. Gallagher, Toledo, O.

of good quality, can be supplied at prices which are claimed to defy competition.

This company also manufactures and supplies for the trade miners' bellows, common and fancy hand bellows, tuyeres of all kinds, smiths aprons, vises, tongues, pincers, punches, taps and dies, hammers, portable and stationary forges, riveting forges, etc. Complete price-list, or estimates on special orders, will be furnished on application, free of charge, to all who will mention this journal when sending their inquiries.

The advertisement features a collection of industrial equipment. On the left is a large bellows with the text 'BULLOCK 13C' and 'CLEVELAND OHIO'. Next to it is a small machine with a flywheel. To the right are several cylindrical components, some labeled 'BULLOCK' and 'TUBE'. Further right are three more bellows, labeled 'MINERS', 'STANDARD', and 'EXTRA LONG'. The company name and location are printed at the bottom left, and a claim to be the largest manufacturer in the world is on the right.
